•Liquidity locked for 2 years in Crow Finance token locker <https://crowfi.app/lockers/3>

•Information about how to read the lockers on the next page.

Token lockers

- You can verify all the locking times by copy/paste the uint256 code from 2. end – part from “Read Contract” to any unix time converter on the internet for example https://time.is/Unix_time_converter
- Also, there is counter below the “Read Contract” page, section 8. timeLeftSeconds which the duration of the lock in seconds. – This, how ever is VERY rough estimate due how the timestamps in block chain environment works (very good explanation about this can be found from Crowfi <https://t.me/CrowFi/94662>)
- The dates on the token lockers are written in blockchain and can't be changed.
Neither should they be taken as any kind of roadmap or similar.

Future plans

•PadloMoon project has many opportunities, that the team is researching. Our token lockers provides us time needed for research and accurate calculations, which benefits all. Currently under research are:

- LP farming.
- Staking.
- Lottery and gambling solutions.
- We are also making connections with other projects for co-operation.
- PadloMoon NFT collection is on the drawing board.
- DEX listing, done.

PDM-Team

- PadloMoon has a team of 10 people consisting of highly skilled professionals from many different business areas like entrepreneurs, developers, marketing, administration and public relations.
- All based and reliable.
- Whole team stays anonymous for time being.
